

Google Drive for Work

Google Drive for Work is a premium cloud offering for businesses that includes unlimited data storage, and accessibility to all files, folders and backups from anywhere, on any device.

Work without limits

Comprehensive new security controls, paired with the Google Apps for Business suite of solutions allows for fluid, unparalleled team collaboration.

All your work - immediately accessible, safe and easy to share

Google Drive makes it easy to access your files from any smartphone, tablet, or computer. Share them instantly with teammates, customers or partners - even with people that don't use Google Drive.

FEATURES

-  Unlimited storage, including files up to 5 TB
-  Enhanced audit view - admins see activity like moving, sharing and deleting files within or outside the company
-  New security controls - admins can set sync client, offline Drive app and add-on settings at the Organizational Unit (OU) level
-  Includes Google Apps Vault - expanded to cover all of the content in Drive, including Docs, Sheets and Slides
-  All files uploaded to Google Drive are encrypted, from your device to Google, in transit, and at rest in Google's servers
-  99.9% uptime guarantee!

BENEFITS

-  Increased productivity and collaboration through accessibility from anywhere - Mobile (iOS and Android support)
-  Improved sharing with non-Google Apps or Drive users
-  No limits on file editing - even with Microsoft Office files
-  Fine-grained control and increased visibility to team activity
-  More organizational security at every layer (mobile security, eDiscovery, suspicious login detection)
-  Heightened collaboration with Google Apps for Business solutions, like Drive, Docs and Hangouts!
